KINETIC DEPTH · ONE-PAGE CALCULATOR

What a missed call costs your business

Fill in four numbers. Most owners underestimate this by 3× because missed calls don't show up anywhere.

Line	Your number	Clinic example
A · Calls you get per day	_____	18
B · Share that ring out or hit voicemail (busy, after hours, lunch)	_____ %	25% (4.5 calls)
C · Share of those who book if a human or an AI answers	_____ %	40% (1.8 bookings)
D · Average value of one booking (first visit + repeat)	$ _____	$220
Lost per day = A × B × C × D	$ _____	**$396**
Lost per month (26 days)	$ _____	**$10,296**

Our own test, 4 Oct 2026: of 12 New York businesses called during opening hours, 2 never picked up and 4 went to voicemail. Fewer than 1 in 3 voicemail callers leave a message; the rest call the next name on Google.

Three ways to cut line B to near zero

1. Forward unanswered calls to a person (works, costs a salary or an answering service).
2. Text-back automation ("Sorry we missed you, reply BOOK") — recovers some, not the ones who already called your competitor.
3. An AI receptionist that answers every call, books, and texts you the details. Ava does this; free for 7 days, set up by us, no automatic billing.
